

K5 SERVICES

OIL • GAS • RENEWABLE ENERGY

Solar & Wind

K5 Services is a full-service maintenance entity. We aim to build long-term relationships by providing full-service solar farm mowing, weed-eating, brush-hogging, and maintenance.

K5 offers various wind farm management services, including right-of-way maintenance, vegetation control, and dirt work, along with the construction of roads, pads, fences, and cattle guards.

K5 SERVICES

OIL · GAS · RENEWABLE ENERGY

Environmental Services

K5 Services is leading the way in responsible and efficient environmental solutions utilizing cutting-edge environmentally friendly disposal and recycling technologies. As a result, we can handle all types of oil and gas waste. Beyond cleanup services, all of our operations follow EPA guidelines, state and federal laws, along with those of local jurisdictions.

Dig and Haul

For every project, K5 develops a plan to treat, remove, and dispose of waste products in a timely and economic manner.

Frac & Reserve Pit Reclamation

K5 responsibly and ethically handles all toxic waste products from beginning to end.

Soil Restoration

K5 offers a broad range of soil remediation technologies. Through our experience, we understand that each site is unique.

Oil & Gas Services

K5 Services offers various oil and gas construction solutions employing skilled specialists capable of working within strict time frames. In addition, we are prepared to work in the harshest conditions common to the oilfield.

- Working to build long-term relationships with clients
- Adapting to meet client and site-specific needs.
- Completing projects in a timely manner with quality results.

Project Capabilities

- 01** Excavation services using heavy equipment needed to complete any dirt work projects.
- 02** Right-of-way maintenance, vegetation control, and dirt work.
